Spirited Newsletter

VOLUME 3 : ISSUE 3

NOVEMBER 2008

SPECIAL POINTS OF INTEREST:

- CE Kits to Europe
- 2009 Boatbuilding Workshop
- 7th Spirited 380 Launched
- Cruising Rig
- Moulded Daggerboards & EngineHatch /Gutters
- Scale Model
- Building DVD
- Price Rise
- Spirited 380 Video Footage

Hi Everyone,

Here we are at the end of another year, we have seen great progress and achievement with seven Spirited 380's now on the water with one more to follow in three weeks. Many are now under construction by home and professional builders both within Australia and internationally. Stay tuned in the new year for more launches due.

Spirited 380 & 480 CE Kits to Europe

The first CE Spirited 380 kit is on it's way to Europe. The second will soon follow in the coming weeks.

Both optioned with all the 380 equipment packages in the interest of a high speed build. Some of which include the all composite moulded rudders and daggerboards. We even have the inclusion of ATL Composite's Z'press, a compact package which fits alongside the kit pallets. This Z-Press will assist the desired fast assembly to meet the required deadlines.

These will be full time projects with a team of professionals in charge of the building. Photos of the projects will become available in the following months, so keep a look out on the project pages for the international additions.

The Spirited 480 CE Kit is now being certified and will soon be available. Please contact us if you would like further information.

2009 Boatbuilding Workshop!

Our next workshop will be held in Hervey Bay QLD at Fraser Coast Custom Marine's factory.

The boatbuilding demonstrations will be held in the morning of Saturday 28th February followed by BBQ & drinks. FCCMs company demonstrator Spirited 380 will also be available for viewing with a sail (weather permitting) to follow either that afternoon or on the Sunday 29th February.

This is a great opportunity for those interested in building themselves or interested in a boat built professionally. You can view and test FCCMs product first hand.

For a fun-filled weekend, please complete the form found at the end of this newsletter or download it from our Workshops page from the News section of our website.

RSVP 10th February 2009. Please contact us if you have any questions. We look forward to seeing you there.

Moulded Daggerboards & Engine Hatches/Gutters

We now have available pre-made daggerboards for both the Spirited 380 and 480 models. Again, this will achieve a quicker assembly with a more fluid work flow.

Daggerboard cases are also planned to be supplied ore-fabricated with the kits for the same reason.

Engine hatches /gutter assemblies are also available for the Spirited 380, these have been well tested and will alleviate the crucial detail work which is so important for keeping the engine bay dry.

These will be welcomed packages by the Spirited boat builders. (One less task to undertake!)

'Minx' ... Spirited 380 cruising Indonesia

Jon Hope, the owner of Stallions first launched 380 has spent the last few months cruising *Minx* up the East coast from the Sunshine coast towards Darwin. He then took the leap across to Indonesia, where he is now exploring. From there he plans to continue working his way to the Mediterranean. We have asked Jon to drop us a line and share his adventure we us. We look forward to hearing all about it.

Spirited 380 Scale Model

Due to request, we have developed a 1.2m long scale model of the Spirited 380. This is computer-cut from 1.5mm plywood and will replicate the Spirited Assembly System. This model kit is available as a home project for anyone interested in undertaking this project. Please contact us for more information.

Spirited Building DVD

The building DVD is now completed and will be included with the kit. This is a guide to the construction of the Spirited 380 kit, with extensive photographs of the building techniques used.

Kit Price Rise

There will be a price increase on our kits due to material price increases in the market as of December 10th. For anyone interested in placing your order it will be worthwhile to take advantage of our current price.

Please contact us if you would like more information.

Spirited 380 video footage

Stallion Marine have compiled a video presentation of their third launched Spirited 380, *Gaia* that was showing at this years Sanctuary Cove Boat Show. Have a look at our news section.

Christmas Close Down

We will be closing from the 18th December 2008 and re-open on Monday 5th January 2009.

We would like to wish everyone a Safe and Happy Christmas in the company of all your friends and family.

Spirited Designs specializes in pre-cut kit assembly using cad-assisted technology. To design cutting-edge multihulls you need to use cutting-edge technology and software. Craig's practical building background combined with a good eye for modern flowing lines creates a good sound basis for not only a modern, safe good-looking boat but an easy to build assembly process using the best choice in modern materials available.
